¹North American Industry Classification System, 2012.

²GGS employment is the number of jobs related to the production of Green Goods and Services. This table reflects private ownership only.

³GGS percent is the percentage of the GGS employment compared to the total employment. This value is derived by dividing the GGS employment by the total employment.

⁴Source: Quarterly Census of Employment and Wages (QCEW) 2011 annual average.

⁵Industries may not add to total because of unclassified employment in the QCEW. The unclassified NAICS sector is not shown separately, but it is included in the total.

⁶Over-the-year percentage change is the percentage change of GGS employment from 2010 to 2011. This value is derived by dividing the change in GGS employment by the 2010 GGS employment.

⁷Data do not meet BLS disclosure standards.

⁸No private sector establishments are classified in this industry.

NOTE: GGS data for 2010 have been revised to incorporate methodological changes explained in the Technical Note. Please also note data may not add to total or subtotal due to rounding.

* Significant over-the-year changes are calculated at a 90 percent confidence level.
